

California Proposition 65 Compliance

California Proposition 65, officially known as the Safe Drinking Water and Toxic Enforcement Act of 1986, was enacted in November 1986. The proposition protects the state's drinking water sources from being contaminated with chemicals known to cause cancer, birth defects or other reproductive harm, and requires businesses to inform Californians about exposures to such chemicals. Further regulations are in effect as of August 30, 2018.

Taiwan semiconductor's products and evaluation kits are not intended to expose any person to any chemical on the Prop 65 List during normal product use. Accordingly, the Prop 65 "clear and reasonable" warnings requirements do not apply to Taiwan semiconductor products and evaluation kits. As a result, Taiwan semiconductor products and evaluation kits do not include warnings specifically related to Prop 65 or the Prop 65 List chemicals and Taiwan semiconductor does not make available a specific list of Prop 65 List chemicals that may be contained in our semiconductor products and evaluation kits.

Last but not least, Taiwan semiconductor reviews its suppliers' certifications, material content research, and confidentially disclosed chemicals and materials information. Based on this third-party information, Taiwan semiconductor has determined to the best of its knowledge and belief that certain Taiwan semiconductor products and evaluation kits may contain one or more of chemicals on the Prop 65 List. If present, these chemicals are not intended to be exposed to users, nor are they intended to be released or discharged during normal product use. If after review of available material content information and our products we determine an exposure requiring a Prop 65 warning may exist, Taiwan semiconductor will provide the necessary "clear and reasonable" warning.
